ACKNOWLEDGEMENTS

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country.(Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation. classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

For the months of July-September 1957, an attempt was made to obtain 100 percent verification by Customs Officials of import data for all cotton manufactures. During this three month period about 90 percent of the total value of these imports was verified before compilation and publication in the regular reports.

For the months of October 1957 through October 1961, the verification by Customs Officials was limited to a 10 percent sample of cotton import shipments. Errors found in the 10 percent sample verification were used primarily (1) by Customs to call the attention of the individual importers to the particular types of errors being made in an attempt to prevent similar reporting errors in the future, and (2) by Census to obtain information as to the accuracy of classification of imports as reported by the importers. Cumulative analyses of the 10 percent verified sample are presented on page 4 of the October 1957 - October 1961 issues of this report.

For the months of November and December 1961, the verification by Customs Officials was expanded to full 100 percent at the following seven Customs ports:

Boston, Mass.	Norfolk, Va.
New York, N. Y.	New Orleans, La.
Philadelphia, Pa.	Los Angeles, Calif.
San Francisco, Calif.	

(An analysis of importations by Customs port of entry revealed that the selected ports accounted for about 95 percent of total cotton textiles imports.) Changes made by Customs during the course of the expanded verification, which were received by Census before compilation of the monthly statistics, are reflected in the compiled data in this report. Changes received after the statistics are compiled will be reflected in any future publications of the data. It is estimated that about 90 percent of the entries for the selected Customs ports were verified before compilation and publication in the regular reports.

Beginning January 1962, all import shipments reported on immediate consumption and warehouse entries are verified by Customs Examiners before inclusion in the statistics. An article explaining the Customs Examiner verification procedure appears in the January 1962 issue of Report No. FT-110, United States Imports of Merchandise for Consumption.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 1[illegible]-1[illegible]. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 6D of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-159. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

ACKNOWLEDGEMENTS

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 193[illegible] (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country.(Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation. classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

For the months of July-September 1957, an attempt was made to obtain 100 percent verification by Customs Officials of import data for all cotton manufactures. During this three month period about 90 percent of the total value of these imports was verified before compilation and publication in the regular reports.

For the months of October 1957 through October 1961, the verification by Customs Officials was limited to a 10 percent sample of cotton import shipments. Errors found in the 10 percent sample verification were used primarily (1) by Customs to call the attention of the individual importers to the particular types of errors being made in an attempt to prevent similar reporting errors in the future, and (2) by Census to obtain information as to the accuracy of classification of imports as reported by the importers. Cumulative analyses of the 10 percent verified sample are presented on page 4 of the October 1957 - October 1961 issues of this report.

For the months of November and December 1961, the verification by Customs Officials was expanded to full 100 percent at the following seven Customs ports:

Boston, Mass.	Norfolk, Va.
New York, N. Y.	New Orleans, La.
Philadelphia, Pa.	Los Angeles, Calif.
San Francisco, Calif.	

(An analysis of importations by Customs port of entry revealed that the selected ports accounted for about 95 percent of total cotton textiles imports.) Changes made by Customs during the course of the expanded verification, which were received by Census before compilation of the monthly statistics, are reflected in the compiled data in this report. Changes received after the statistics are compiled will be reflected in any future publications of the data. It is estimated that about 90 percent of the entries for the selected Customs ports were verified before compilation and publication in the regular reports.

Beginning January 1962, all import shipments reported on immediate consumption and warehouse entries are verified by Customs Examiners before inclusion in the statistics. An article explaining the Customs Examiner verification procedure appears in the January 1962 issue of Report No. FT-110, United States Imports of Merchandise for Consumption.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles i included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTH'S REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ACCURACY OF DATA ON IMPORTS OF COTTON MANUFACTURES

For the months of July-September 1957, an attempt was made to obtain 100 percent verification by Customs Officials of import data for all cotton manufactures. During this three month period about 90 percent of the total value of these imports was verified before compilation and publication in the regular reports.

For the months of October 1957 through October 1961, the verification by Customs Officials was limited to a 10 percent sample of cotton import shipments. Errors found in the 10 percent sample verification were used primarily (1) by Customs to call the attention of the individual importers to the particular types of errors being made in an attempt to prevent similar reporting errors in the future, and (2) by Census to obtain information as to the accuracy of classification of imports as reported by the importers. Cumulative analyses of the 10 percent verified sample are presented on page 4 of the October 1957 - October 1961 issues of this report.

For the months of November and December 1961, the verification by Customs Officials was expanded to full 100 percent at the following seven Customs ports:

Boston, Mass.	Norfolk, Va.
New York, N. Y.	New Orleans, La.
Philadelphia, Pa.	Los Angeles, Calif.
San Francisco, Calif.	

(An analysis of importations by Customs port of entry revealed that the selected ports accounted for about 95 percent of total cotton textiles imports.) Changes made by Customs during the course of the expanded verification, which were received by Census before compilation of the monthly statistics, are reflected in the compiled data in this report. Changes received after the statistics are compiled will be reflected in any future publications of the data. It is estimated that about 90 percent of the entries for the selected Customs ports were verified before compilation and publication in the regular reports.

Beginning January 1962, all import shipments reported on immediate consumption and warehouse entries are verified by Customs Examiners before inclusion in the statistics. An article explaining the Customs Examiner verification procedure appears in the January 1962 issue of Report No. FT-110, United States Imports of Merchandise for Consumption.

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(Tha tabla which follows presenta quantity data for United Statas genaral imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textilsa enumerated in Appendix 3 to tha GATT atatement of July 21, 1961, entitled "Arrangemsnts Regarding International Trade in Cotton Taxtilas." Data for four categoriea (i.e., cardad and combed lawns and voilea) ars not shown separately. Data for cardsd lawns and voilea are included in this table under category 26, whila information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are preseented in commodity by country arrangement in a preceding section of this rsport undar commodity numbers 155-158. Data shown in tha column for "cumulative to dats" represent cumulative totals from October 1961 through the current month.)

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

ANNOUNCEMENTS AND SPECIAL NOTICES

DATA ON UNITED STATES GENERAL IMPORTS OF COTTON AND OTHER TEXTILE MANUFACTURES AVAILABLE FOR PUBLIC REFERENCE -- GATT AGREEMENT CATEGORIES

Effective with the April 1962 statistics, specially compiled quantity data on United States general imports of cotton and other textile manufactures will be available for public reference. These data will be released monthly in Tabulation IM-166, United States General Imports of Cotton and Other Textile Manufactures from Countries Other Than Japan, agreement category by Schedule A by country of origin arrangement. In addition to the current monthly total, this tabulation will present 1961 fiscal year (base year) and cumulative (October 1961 to date) totals. The tabulation will be available for public reference about the first or second week of the second month following the month covered at the following locations:

Users of the statistics are asked to read all of the explanatory material accompanying the first tabulation before using the data therein.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels. It is the objective of the compiling procedures, insofar as practical, to include shipments in the general import statistics for the month of import which, in general, is based on the date of filing of the immediate consumption or warehouse entry. However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following).

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTH'S REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ACCURACY OF DATA ON IMPORTS OF COTTON MANUFACTURES

For the months of July-September 1957, an attempt was made to obtain 100 percent verification by Customs Officials of import data for all cotton manufactures. During this three month period about 90 percent of the total value of these imports was verified before compilation and publication in the regular reports.

For the months of October 1957 through October 1961, the verification by Customs Officials was limited to a 10 percent sample of cotton import shipments. Errors found in the 10 percent sample verification were used primarily (1) by Customs to call the attention of the individual importers to the particular types of errors being made in an attempt to prevent similar reporting errors in the future, and (2) by Census to obtain information as to the accuracy of classification of imports as reported by the importers. Cumulative analyses of the 10 percent verified sample are presented on page 4 of the October 1957 - October 1961 issues of this report.

For the months of November and December 1961, the verification by Customs Officials was expanded to full 100 percent at the following seven Customs ports:

Boston, Mass.	Norfolk, Va.
New York, N. Y.	New Orleans, La.
Philadelphia, Pa.	Los Angeles, Calif.
San Francisco, Calif.	

(An analysis of importations by Customs port of entry revealed that the selected ports accounted for about 95 percent of total cotton textiles imports.) Changes made by Customs during the course of the expanded verification, which were received by Census before compilation of the monthly statistics, are reflected in the compiled data in this report. Changes received after the statistics are compiled will be reflected in any future publications of the data. It is estimated that about 90 percent of the entries for the selected Customs ports were verified before compilation and publication in the regular reports.

Beginning January 1962, all import shipments reported on immediate consumption and warehouse entries are verified by Customs Examiners before inclusion in the statistics. An article explaining the Customs Examiner verification procedure appears in the January 1962 issue of Report No. FT-110, United States Imports of Merchandise for Consumption.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels. It is the objective of the compiling procedures, insofar as practical, to include shipments in the general import statistics for the month of import which, in general, is based on the date of filing of the immediate consumption or warehouse entry. However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following).

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTH'S REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ACCURACY OF DATA ON IMPORTS OF COTTON MANUFACTURES

For the months of July-September 1957, an attempt was made to obtain 100 percent verification by Customs Officials of import data for all cotton manufactures. During this three month period about 90 percent of the total value of these imports was verified before compilation and publication in the regular reports.

For the months of October 1957 through October 1961, the verification by Customs Officials was limited to a 10 percent sample of cotton import shipments. Errors found in the 10 percent sample verification were used primarily (1) by Customs to call the attention of the individual importers to the particular types of errors being made in an attempt to prevent similar reporting errors in the future, and (2) by Census to obtain information as to the accuracy of classification of imports as reported by the importers. Cumulative analyses of the 10 percent verified sample are presented on page 4 of the October 1957 - October 1961 issues of this report.

For the months of November and December 1961, the verification by Customs Officials was expanded to full 100 percent at the following seven Customs ports:

Boston, Mass.	Norfolk, Va.
New York, N. Y.	New Orleans, La.
Philadelphia, Pa.	Los Angeles, Calif.
San Francisco, Calif.	

(An analysis of importations by Customs port of entry revealed that the selected ports accounted for about 95 percent of total cotton textiles imports.) Changes made by Customs during the course of the expanded verification, which were received by Census before compilation of the monthly statistics, are reflected in the compiled data in this report. Changes received after the statistics are compiled will be reflected in any future publications of the data. It is estimated that about 90 percent of the entries for the selected Customs ports were verified before compilation and publication in the regular reports.

Beginning January 1962, all import shipments reported on immediate consumption and warehouse entries are verified by Customs Examiners before inclusion in the statistics. An article explaining the Customs Examiner verification procedure appears in the January 1962 issue of Report No. FT-110, United States Imports of Merchandise for Consumption.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES
Supplement

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

ANNOUNCEMENTS AND SPECIAL NOTICES

CHANGE IN BASIC STATISTICAL REPORTING PROCEDURE FOR IMPORTS EFFECTIVE JANUARY 1, 1962

Beginning January 1, 1962, the statistical copies of virtually all formal consumption and warehouse entries are being reviewed by the Customs appraisers of merchandise before they are forwarded to the Bureau of the Census for inclusion in statistics. This review will be made for all consumption and warehouse entry transactions ordinarily subject to examination for Customs appraisement purposes. (It will exclude such shipments as those made by or for the account of the United States Department of Defense, General Services Administration, and the Atomic Energy Commission, since these are not ordinarily subject to Customs examination or appraisement.)

Information on the entries reviewed by the appraiser will be verified and reported for statistical purposes with respect to country of origin and commodity classification (including quantity and value) as required by United States Import Duties Annotated for Statistical Reporting. This verification of statistical data will be made at the time the examiner reviews invoices and samples of merchandise for Customs appraisement purposes. When information at hand is not sufficient to permit complete verification of some of the data on an entry, the Customs examiner will verify or change the reported data on the basis of his experience and the best additional information available. This will enable the appraiser to meet an established deadline for submitting all statistical reports for the month, so as to help safeguard against any appreciable loss in the uniformity of month-to-month coverage.

The procedure for linking the verification of statistical data with the physical examination of merchandise and invoices which the Customs examiner makes for appraisement purposes results in improving the quality of the import statistics. However, for warehouse withdrawals, which constitute about 10 percent of the total value of monthly "imports for consumption," the benefits of the verification procedure will be only of an indirect nature (e.g., through "education" of Customs brokers filing the withdrawals against verified warehouse entries) and improvement in statistical accuracy will, of necessity, be slower than for the over-all. Warehouse withdrawal documents are not routed to the appraiser as part of the regular Customs appraisement procedure. An alternate method is being studied for obtaining corrected reports on withdrawals, based on the corresponding warehouse entries. However, many withdrawals in a current month's statistics are filed against prior years' warehouse entries for which no corrective reports will have been prepared.

Other known problem areas in the verification procedure are being studied and more may be encountered and have to be resolved during the early phases of the program. These will be discussed in subsequent issues of this report as more information about them becomes available. Some experience will be needed, of course, before the full potential of this program can be put to effective use, or the expected results therefrom can be completely realized. However, there can be little doubt that within its framework lies the basis for providing the much needed over-all improvement in the quality of the import statistics.

LOW-VALUED WAREHOUSE ENTRY TRANSACTIONS INCLUDED IN GENERAL IMPORTS STATISTICS ON SAMPLE BASIS, EFFECTIVE JANUARY 1962

Effective with data for January 1962, warehouse entry shipments individually valued less than $100 are being excluded from the detailed commodity statistics on general imports but will be included, together with the sample data for informal and low-valued formal consumption entry shipments, under arbitrary Schedule A commodity number 9999 500, with arbitrary Customs district code 99 and subgroup 990, by country of origin. (Commodity statistics for general imports are not available in printed form but are shown in machine tabulations available for public reference.) Preliminary studies have indicated that the volume of low-valued warehouse entry items is quite small, and that the effect of excluding them from commodity statistics will be minor. The low-valued warehouse entry shipments are being included in the general imports statistics on the basis of estimates made from a one percent sample of such shipments, as has been done for formal consumption entry shipments valued less than $100 and for informal entry shipments valued $250 or less.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

Effective January 1, 1962, information on 2-digit commodity groupings and 3-digit commodity numbers are reported in this report in accordance with the classifications presented below. The 7-digit Schedule A commodity classifications being combined to form each 3-digit number are shown immediately following the 3-digit description. Commodity descriptions for the 7-digit numbers may be obtained from Schedule A, Statistical Classifications of Commodities Imported into the United States.

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from United States possessions and shipments between these outlying areas are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. Also excluded, effective January 1958, is information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) Effective January 1962, warehouse entry shipments individually valued less than $100 are excluded. Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

It is the objective of the compiling procedures, insofar as practical, to include shipments in the general import statistics for the month of import which, in general, is based on the date of filing of the immediate consumption or warehouse entry.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs. Effective January 1962, statistical factors of country of origin, net quantity, value and United States Import Duties Annotated commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries. This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Articles containing additional information regarding the Customs Examiner verification procedure appear in the June 1962 issue of this report. For information regarding verification procedures in effect prior to January 1962, see previous issues of this report.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

COMMODITY INFORMATION

Information on cotton commodity classification by groupings of cotton commodities is reported in order of the numbered classifications presented in the table on page 4 of the June 1962 issue of this report. The Schedule A, Statistical Classification of Commodities Imported into the United States, commodity numbers included in each cotton commodity are also shown in the table. For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was produced or manufactured. Where the country of origin is not known, the country of shipments is shown and footnoted in this report. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of Report No. FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin. A Catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity, the second quantity is shown separately, without value, under the same commodity number (e.g., "Gingham cloth, carded yarn" and "Sheeting, combed yarn", commodity numbers 105 and 112, respectively)]

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the columns for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from United States possessions and shipments between these outlying areas are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. Also excluded, effective January 1958, is information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) Effective January 1962, warehouse entry shipments individually valued less than $100 are excluded. Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

It is the objective of the compiling procedures, insofar as practical, to include shipments in the general import statistics for the month of import which, in general, is based on the date of filing of the immediate consumption or warehouse entry.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs. Effective January 1962, statistical factors of country of origin, net quantity, value and United States Import Duties Annotated commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries. This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Articles containing additional information regarding the Customs Examiner verification procedure appear in the June 1962 issue of this report. For information regarding verification procedures in effect prior to January 1962, see previous issues of this report.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

[1]For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

COMMODITY INFORMATION

Information on cotton commodity classification by groupings of cotton commodities is reported in order of the numbered classifications presented in the table on page 4 of the June 1962 issue of this report. The Schedule A, Statistical Classification of Commodities Imported into the United States, commodity numbers included in each cotton commodity are also shown in the table. For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was produced or manufactured. Where the country of origin is not known, the country of shipments is shown and footnoted in this report. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of Report No. FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin. A Catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity, the second quantity is shown separately, without value, under the same commodity number (e.g., "Gingham cloth, carded yarn" and "Sheeting, combed yarn", commodity numbers 105 and 112, respectively)]

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from United States possessions and shipments between these outlying areas are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. Also excluded, effective January 1958, is information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) Effective January 1962, warehouse entry shipments individually valued less than $100 are excluded. Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

It is the objective of the compiling procedures, insofar as practical, to include shipments in the general import statistics for the month of import which, in general, is based on the date of filing of the immediate consumption or warehouse entry.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs. Effective January 1962, statistical factors of country of origin, net quantity, value and United States Import Duties Annotated commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries. This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Articles containing additional information regarding the Customs Examiner verification procedure appear in the June 1962 issue of this report. For information regarding verification procedures in effect prior to January 1962, see previous issues of this report.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

[1]For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

COMMODITY INFORMATION

Information on cotton commodity classification by groupings of cotton commodities is reported in order of the numbered classifications presented in the table on page 4 of the June 1962 issue of this report. The Schedule A, Statistical Classification of Commodities Imported into the United States, commodity numbers included in each cotton commodity are also shown in the table. For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was produced or manufactured. Where the country of origin is not known, the country of shipments is shown and footnoted in this report. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of Report No. FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin. A Catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity, the second quantity is shown separately, without value, under the same commodity number (e.g., "Gingham cloth, carded yarn" and "Sheeting, combed yarn", commodity numbers 105 and 112, respectively)]

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from United States possessions and shipments between these outlying areas are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. Also excluded, effective January 1958, is information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) Effective January 1962, warehouse entry shipments individually valued less than $100 are excluded. Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

It is the objective of the compiling procedures, insofar as practical, to include shipments in the general import statistics for the month of import which, in general, is based on the date of filing of the immediate consumption or warehouse entry.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs. Effective January 1962, statistical factors of country of origin, net quantity, value and United States Import Duties Annotated commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries. This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Articles containing additional information regarding the Customs Examiner verification procedure appear in the June 1962 issue of this report. For information regarding verification procedures in effect prior to January 1962, see previous issues of this report.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

[1]For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

COMMODITY INFORMATION

Information on cotton commodity classification by groupings of cotton commodities is reported in order of the numbered classifications presented in the table on page 4 of the June 1962 issue of this report. The Schedule A, Statistical Classification of Commodities Imported into the United States, commodity numbers included in each cotton commodity are also shown in the table. For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was produced or manufactured. Where the country of origin is not known, the country of shipments is shown and footnoted in this report. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of Report No. FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin. A Catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity, the second quantity is shown separately, without value, under the same commodity number (e.g., "Gingham cloth, carded yarn" and "Sheeting, combed yarn", commodity numbers 105 and 112, respectively)]

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. However, current monthly totals for these commodities are presented in commodity by country arrangement in a preceding section of this report under commodity numbers 155-158. Data shown in the column for "cumulative to date" represent cumulative totals from October 1961 through the current month.)

United States import Statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

Groupings of commodities in terms of the Geneva Agreement Categories and factors used in converting Schedule A quantities to category quantities were supplied by the Office of Textiles, Business and Defense Services Administration, G. Erwin Dixon, Chief.

ANNOUNCEMENTS AND SPECIAL NOTICES

REPORT NO. FT-130 PRESENTS ONLY CATEGORY DATA BEGINNING OCTOBER 1962

Effective with the statistics for October 1962, Report No. FT 130 has been revised to present only quantity data on United States imports of cotton manufactures in terms of the cotton textile categories presented in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." This arrangement will be similar to that presented for data on Geneva Agreement categories in the October 1961-September 1962 issues of this report.

Quantity and value data in terms the 2-digit groupings and 3-digit commodity classifications previously shown in the monthly issues of Report No. FT 130 through September 1962 have been discontinued. The original classifications for reporting cotton manufactures in Report No. FT 130 were designed to provide data for the administration of the bi-lateral agreements between the United States and Japan on cotton textiles. However, these agreements have expired and cotton textile imports from Japan are now being evaluated in terms of the categories which are being used for the so-called "Long-Term Cotton Textile Arrangement."

Effective with the October 1962 issue, two columns of quantity data are being presented in Report No. FT 130 in country of origin by textile category arrangement. These are, (1) cumulative totals for the period from October 1962 through the current month and (2) current month totals. Quantities in the report are in terms of the units of quantity required for the cotton textile categories. A list of these categories along with the Schedule A commodity numbers being grouped under each category and the unit of quantity for each category is included in another article in this report.

Users of the statistics who desire more detailed commodity data than that presented in this report may obtain such data from the monthly issues of Foreign Trade Table No. TQ-2001, United States General Imports of Cotton Manufactures, Geneva Agreement Category by country of origin, also showing Schedule A commodity by country of origin for each Geneva Agreement Category. Users of the statistics who subscribed to Report No. FT 130 for 1962 are being furnished with copies of the revised reports for the remaining months of the year. In addition, monthly issues of the report for the early months of 1963 will be sent to the above-mentioned subscribers pending the receipt of their subscriptions to the 1963 monthly issues of the report. For further information, users should write to the Bureau of the Census, Foreign Trade Division, Washington, D. C.

GROUPINGS OF SCHEDULE A COMMODITY NUMBERS UNDER TEXTILE CATEGORIES

Effective with October 1962, data are presented in this report for United States general imports of cotton manufactures in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Shown below are the 60 categories under which the statistics are compiled, along with the 7-digit Schedule A commodity numbers being grouped under each category. Commodity descriptions for the 7-digit numbers may be obtained from Schedule A, Statistical Classifications of Commodities Imported into the United States. The 7-digit Schedule A commodity numbers are grouped under the textile categories in a manner to provide data which would be comparable to that available prior to January 1962. Even though more detailed Schedule A classifications were established in January and October 1962, these classifications were not re-aligned under the categories. For example, carded and combed lawns and voiles are includes with "cotton fabrics, n.e.s.," rather than under Categories 11-14, since separate data for these commodities were not available during the periods prior to January 1962.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from United States possessions and shipments between these outlying areas are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. Also excluded, effective January 1958, is information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) Effective January 1962, warehouse entry shipments individually valued less than $100 are excluded. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

It is the objective of the compiling procedures, insofar as practical, to include shipments in the general import statistics for the month of import, which, in general, is based on the date of filing of the immediate consumption or warehouse entry.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early released dates made possible with the use of electronic equipment. For cotton manufactures, however, the amount of carry-over is reduced substantially by special semi-monthly processing.

EMBARGOED (RESTRAINED) SHIPMENTS

Under the provisions of the Long-term Cotton Textile Arrangements, the United States may request a foreign country to limit its exports of certain cotton textiles to this country, or may act to restrain the importation of such cotton textiles in excess of a particular restraint level. In instances where the restraint is on imports, entries of such textiles into bonded storage warehouses after the restraint level is reached are excluded from the statistics in this report. The data are included, however, when the merchandise is withdrawn from warehouse and permitted entry into the domestic consumption channels, and are then included in import for consumption figures such as those presented in the FT 110, IM-145, etc.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs. Effective January 1962, statistical factors of country of origin, net quantity, value and United States Import Duties Annotated commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries. This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

COMMODITY INFORMATION

Data on cotton manufactures are presented in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled, "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Information for carded lawns and voiles is included in this report under category 26, while data for combed lawns and voiles are included under category 27. The Schedule A, Statistical Classification of Commodities Imported into the United States, commodity numbers included in each cotton commodity category are shown in the table on page i of this report.

QUANTITY INFORMATION

The quantity reported in the statistics is in terms of the units of quantity set forth in Appendix 3 (see above) for the cotton textile categories. In instances where the reported quantity for a Schedule A commodity number is in terms of a unit of quantity other than that required for the category, the Schedule A quantity has been converted to the category quantity through the use of factors supplied by the Business and Defense Services Administration of the Department of Commerce. For groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbrev.	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was produced or manufactured. Where the country of origin is not known, the country of shipment is shown and footnoted in this report. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of Report No. FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin. A Catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT agreement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. Data shown in the column for "cumulative to date" represent cumulative totals from October 1962 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. Data shown in the column for "cumulative to date" represent cumulative totals from October 1962 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. Data shown in the column for "cumulative to date" represent cumulative totals from October 1962 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. Data shown in the column for "cumulative to date" represent cumulative totals from October 1962 through the current month.)

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

COUNTRY OF ORIGIN BY GENEVA AGREEMENT CATEGORY

(The table which follows presents quantity data for United States general imports of cotton manufactures (in country of origin by commodity arrangement) in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded in combed lawns and voiles) are not shown separately. Data for carded lawns and voiles are included in this table under category 26, while information for combed lawns and voiles is included under category 27. Data shown in the column for "cumulative to date" represent cumulative totals from October 1962 through the current month.)
